Bacillus Coagulans

This nutraceutical contains one strain of bacteria that is strong and stable enough to survive stomach acid, retains its potency in the intestines, and is an excellent choice for acute events and recovery. Bacillus Coagulans support the microbiota bacteria, which are part of the microbiome, as well as the genetic material and metabolites associated with these bacteria.

Probiotics are living microorganisms, like bacteria and yeast, that reside in our gut and are vital for our body to function properly. However, our contemporary diet and modern medicine have made it very easy for the body to lose the most important types of gut bacteria, leaving our body to slow down or be sluggish. When taken daily, probiotics promote good gut microbiota bacteria that support a healthy immune system, hormone and pH balance, weight management, and a steady digestive system. Bacillus Coagulans helps replenish and support healthy bacteria in your microbiome. The microbiome plays a vital role in the recycling and metabolizing of hormones, including thyroid hormones and estrogen. Biote Bacillus Coagulans retains its potency in the intestines, and is an excellent choice for acute events and recovery. Packaging protects each capsule from natural factors proven to compromise probiotics' stability, such as heat, moisture, and oxygen. The strain selected is well-researched and identity-verified and has been genetically characterized and properly classified for safety and assurance.

Form:

Capsules

Serving Size:

1-3 capsules

Number of Servings Per Bottle:

20-60

Suggested Use:

Take 1 capsule 2-3 times daily or as recommended by a healthcare practitioner.

Allergies:

This product is contraindicated in an individual with a history of hypersensitivity to any of its ingredients. This product is soy free, dairy free, and gluten free.

Active Ingredient:

Bacillus Coagulans 133 mg.

Other Ingredients:

Microcrystalline Cellulose, Hypromellose (derived from cellulose) capsule, Silicon Dioxide.

Warnings:

This product is not intended for children under the age of 18 or those who are pregnant or nursing. Consult your physician for further information.
