

Covid Update:

To minimize risk to our patients, physicians and staff, we are monitoring CDC, the State of Michigan Coronavirus Task Force, professional societies, and federal, state, and local health department ' guidelines. With the assistance of these experts, we have set up office protocol for our patients and staff.

We have implemented safety measures at Northpointe Ob/Gyn.. As a courtesy to others, we ask that you please be up front with any symptoms, exposure and travel that you may have had in the last month so we may maintain safety for our patients and staff.

We practice social distancing and ask that you understand that, at this time, no one can accompany you to your visits. We have made an exception for obstetric ultrasound full anatomy scan (20 weeks of pregnancy). You may have one (1) person accompany you to this visit as of 6/15/20. For this scan, we ask that this person stay in your vehicle until it is time for the exam. Once you are called back, we ask that you text this person and have them report to the designated room.

We sanitize each exam room after each patient as well as the common areas each night.

EVERYONE MUST WEAR FACE MASKS AND SANITIZE WHEN ENTERING THE BUILDING.
